DETAILED ACTION

Continued Prosecution Application

1. The request filed on 8/26/1999 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 08/871,815 is acceptable in view of the Petition granted on 2/5/2003 and a CPA has been established. An action on the CPA follows.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2.1. Claims 13-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,631,357 B1. Although the conflicting claims are not identical, they are not patentably

Art Unit: 3625

distinct from each other because the reasons of allowance for claims 13-28 of the instant application, that is a database management system for storing and managing information representative of a plurality of trademarks and a plurality of uniform resource locators symbolically linked to the trademarks and specifying the location of a plurality of web documents stored in one or more Internet-based information servers; a trademark/URL information server operably connected to the database management system and the infrastructure of the Internet and a plurality of manufacturer client computer systems connected to the database system to transmit information representative of Trademarks are obvious in view of the independent claims 1 and 5 of the Patent' 357.

Allowable Subject Matter

3. Claims 13-28 include allowable subject matter. The following is an examiner's statement of reasons for allowance:

The prior art, when considered as a whole, fails to teach or fairly suggest a database management subsystem for storing and managing information representative of a plurality of trademarks and a plurality of uniform resource locators symbolically linked to the trademarks and specifying the location of a plurality of Web documents stored in one or more Internet-based information servers; a trademark/URL information server operably connected to the database management subsystem and the infrastructure of the Internet; and a plurality of manufacturer-managed client computer

Art Unit: 3625

subsystems operably connected to the infrastructure of the Internet enabling a manufacturer to transmit to the database management subsystem information representative of a plurality of trademarks and a plurality of URLs symbolically linked to the trademarks, as specifically recited, in combination, in independent claims 13 and 22 (renumbered 1 and 10) and as defined by the specification.

Conclusion

4. Allowable subject matter has been indicated in paragraph 3 above. The applicant's reply must either comply with all formal requirements as stated in paragraph 2 "Double Patenting" above or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
